**DETAILED ACTION**

**Claims 1, 4, 5 and 7-41 are pending in the application.**

***Election/Restrictions***

Applicant's election of Group I (claims 1-12 - drawn to products of formula I) in the reply filed on September 15, 2008 was acknowledged in the previous Office Action. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). The requirement was deemed proper and therefore made FINAL in the previous Office Action.

Claims 13-40 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to nonelected inventions, there being no

allowable generic or linking claim. Election was made **without** traverse in the reply filed on September 15, 2008.

Rejections and objections made in the previous Office Action that do not appear below have been overcome by Applicant's amendments to the claims. Therefore, arguments pertaining to these rejections and objections will not be addressed.

### ***Claim Objections***

Claim 9 is objected to because of the following informalities: in claim 9, last line of claim, a space is needed after "claim" in "claim1". Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 4, 5, 7-12 and 41 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, under the definition of R<sup>1</sup>, an "and" is needed before "heteroarylalkyl" for proper Markush language format.

In claim 1, under the definition of R<sup>2</sup>, an "and" is needed before "heteroarylalkyl" for proper Markush language format.

In claim 11, there are species listed in the claim that are not embraced by currently amended claim 1 because of the amendments to the definitions of R<sup>1</sup> and R<sup>2</sup> in claim 1. See the fourth species listed on page 18

and the definition of R<sup>2</sup> in claim 1; the first compound listed on page 21 and the definition of R<sup>1</sup> in claim 1.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 4, 5, 7-12 and 41 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 85-108 of copending Application No. 12/065,989. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claimed compounds are generically claimed in the copending application.

The indiscriminate selection of "some" among "many" is *prima facie* obvious, In re Lemin, 141 USPQ 814 (C.C.P.A. 1964). The motivation to make the claimed compounds derives from the expectation that structurally similar compounds would possess similar activity (e.g., histone deacetylase inhibitor).

One skilled in the art would thus be motivated to prepare products embraced by the copending application to arrive at the instant claimed products with the

expectation of obtaining additional beneficial products which would be useful in treating, for example, inflammatory diseases. The instant claimed invention would have been suggested to one skilled in the art and therefore, the instant claimed invention would have been obvious to one skilled in the art.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

### ***Response to Arguments***

Applicant's arguments filed June 24, 2009 have been fully considered but they are not persuasive. Applicant argues that the obviousness-type double patenting rejection should be withdrawn since the instant application has an earlier filing date than the copending application cited above. In response, since there is another rejection remaining, see above, and

withdrawn claims still pending in the application, the obviousness-type double patenting rejection is maintained.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed,

and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

This application contains claims 13-40 drawn to an invention nonelected without traverse in the reply filed on September 15, 2008. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.
